KNOW YOUR THIRD PARTY

THOMSON REUTERS™

EXECUTIVE SUMMARY

The drive to improve profitability and streamline operations motivates many organizations to collaborate with other businesses, increase outsourcing of non-core activities and to expand their global footprint into unknown territories. While these decisions can and do result in economic benefits, attention must be given to the potential increased costs to ensure those third parties adhere to legal requirements as well as implied standards of conduct.

In today's business environment organizations are held responsible for the actions of suppliers, vendors and partners in addition to their own internal activities. Knowledge and understanding of supplier and third party risk is of the utmost importance. Therefore it is critical that a robust risk management program includes due diligence in the selection of business partners and third parties as well as on-going monitoring activities.

CONNECT, SIMPLIFY, PERFORM

Thomson Reuters offers intelligent market leading data and software as part of our unified platform approach. At the same time, products are modular and can be adopted as point solutions to meet specific needs. At whichever stage your organization finds itself, Thomson Reuters will complement your current third party risk mitigation program to enhance efficiencies and maximize your risk based approach.

The importance of knowing your third parties

All companies and organizations are at risk from the intentional or unwitting actions of third parties, both in terms of indirect liability and the reputational damage that can be incurred by association.

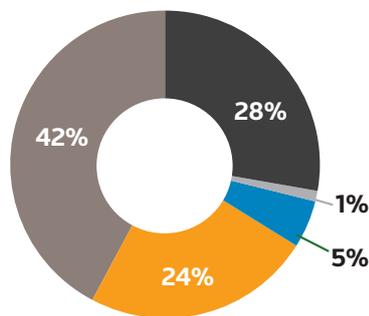

Building and extending relationships with third parties in order to achieve long term business goals usually creates complex supply chains that, over time, more accurately resemble interconnected webs. Knowing who you are dealing with within these webs becomes increasingly more difficult, yet increasingly more important in order to satisfy regulators, meet shareholder and customer expectations, and prevent financial and reputational damage.

The Foreign Corrupt Practices Act (FCPA) and Conflict Minerals Rule (Dodd Frank Section 1502) in the US, Bribery Act and the Modern Day Slavery Act in the UK, in addition to a host of other global regulations, have increased the importance of establishing an effective third

party compliance program. The rate at which these regulations are introduced will only increase as governments, civil society and consumers put anti-corruption, transparency and sustainability at the core of what they do. Under these regulations, an organization's management of third party business relationships should be of equal importance to managing customer business relationships as regulators are increasingly focusing on holding individuals liable for non-compliance.

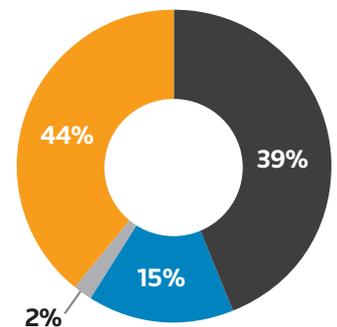

Shareholders and customers are demanding greater transparency and more responsible corporate behavior, in the interests of both reputational integrity and good investment practice.

***OVER THE NEXT 12 MONTHS I EXPECT THE AMOUNT OF REGULATORY INFORMATION PUBLISHED BY REGULATORS AND EXCHANGES TO BE:**

Common risks and a framework to mitigation

While there is no one-size-fits all guidance to supplier and third party risk management, each organization must know its business well enough to understand where risks may materialize and employ processes to detect them; risks such as

- Bribery and corruption
- Extortion and illegal money lending
- Organized crime
- Fraud
- Counterfeiting
- Illicit trade
- Environmental crime
- Conflict minerals
- Human rights abuses
- Slavery and human trafficking

Often what leads to mishaps is not the complexity of supply chains but the lack of management, transparency and monitoring which is fundamental from the beginning of the supply chain through to the end consumer.

In order to prevent, detect and investigate supplier and third party risk, a simple Know Your Third Party (KY3P) framework can be implemented.

One solution to a multitude of challenges

There is no doubt that third party relationships play a key role in the success of an organization. Instead of enlarging the workforce which requires investment in infrastructure, engaging third parties to help the organization meet its objectives can help to save on costs and optimize resources. But these relationships can also introduce substantial risk and need to be carefully managed, never more so than now. As the regulatory environment continues to demand increasing scrutiny and control of third party relationships, the complexity of this management challenge looks set to increase in the coming years.

Companies need to be able to contain these complex relationships and ensure that their response to increasing regulatory pressure is proactive and not ad hoc. This can heavily impact on cost control especially when their third party risk management solutions are fragmented and come from multiple vendors. There is a great advantage of using one service that incorporates all aspects of a best practice third party management solution. With the components designed to work together, it's much easier to fit the service to the unique needs of the organization, to streamline resources and control costs.

Knowing how to effectively manage the risks that third parties pose is the key to a good KY3P program.

Components for a connected third party risk management solution

Thomson Reuters offers an evolved approach to mitigating third party risk. We have created a global KY3P proposition, using a wide variety of trusted assets and leveraging upon our breadth and expertise that looks to identify risks when conducting business with a customer or third parties across many use cases or operations. This allows organizations to adopt a risk based approach by:

- Understanding risks and identifying opportunities
- Taking actions informed by industry-leading intelligence
- Helping navigate industry regulations
- Implementing best practices that drive value
- Maximizing operational efficiency and reducing costs
- Improving efficiency and effectiveness of existing supplier and third party compliance programs

THOMSON REUTERS WORLD-CHECK

World-Check reveals the risk hiding in business relationships and human networks. The result is highly structured intelligence profiles of heightened risk individuals and entities globally. With 240+ countries and territories covered in 60+ languages, our research analysts in all global regions, specialist research to include terrorism, organized crime, Middle East, we are able to satisfy demands for KYC, AML, CFT, and PEP due diligence.

We monitor over 400 sanction, watch and regulatory enforcement lists and hundreds of thousands of information sources, often identifying high-risk entities months or years before they are listed. In 2014 alone we identified more than 202 entities before they appeared on the US Treasury Office of Foreign Assets Control (OFAC) list, and currently exceed terrorist coverage on the leading sanctions by more than 80,000 records. World-Check contains over 12,000 profiles linked to child and slave labor, migrant smuggling, sex trafficking and human trafficking. Screening using World-Check helps to minimize the cost of compliance.

THOMSON REUTERS SCREENING RESOLUTION SERVICE

Screening Resolution Service (SRS) offers a managed KYC screening service for your organization. Thomson Reuters can do the screening and hit remediation on your behalf, highlighting positive and possible matches for heightened risk individuals and entities. We are able to serve your organization's client on-boarding procedures, screen records against World-Check and Country Risk Ranking, perform EDD background checks on selected matches, ensure quality assurance processes are in place check-points at each step to lower your overall costs of operation whereby you are able to demonstrate a complete audit trail to regulators.

THOMSON REUTERS COUNTRY RISK RANKING

Compliance teams can define their risk based approach more efficiently with the availability of detailed country risk intelligence, while doing routine third party due diligence tasks using World-Check. When deciding to expand operations or do business with third parties outside of your territorial borders, Country Risk Ranking allows you to understand the associated risks. Develop an accurate view of your location-based risk to prove third party due diligence to your regulator.

THOMSON REUTERS ENHANCED DUE DILIGENCE

Enhanced Due Diligence (EDD) reports are a cost-effective method of obtaining detailed background and integrity checks on any entity or individual, no matter where they are located. Business conduct and reputation history can be analyzed and a thorough search made for unseen liabilities. Business intelligence is gathered from regulators, industry observers, suppliers, competitors, distributors, and customers both current and former. Our EDD reports cover specific risks relating to terrorism, bribery and corruption, PEPs, conflict minerals, slavery, arms and human trafficking. In Standard and Premium reports, our research analysts routinely search for these risk types flagged for individuals and entities globally.

THOMSON REUTERS COMPLIANCE LEARNING

Our Compliance Learning courses provide practical, interactive, customizable and cost-effective compliance training programs, which assist in changing behavior and supporting a culture of integrity. More than 800 ethics and compliance training courses delivered in over 42 different languages are powered by world-leading regulatory intelligence, which tracks over 500 regulators and exchanges globally.

Our courses are deployed using a flexible and easy-to-use learning management system. This web-based solution optimizes the management, tracking and reporting of your compliance and risk training, and provides a full audit trail to demonstrate compliance.

SUPPLIER ON-BOARDING QUESTIONNAIRE AND PLATFORM

We have partnered with market leading third party on-boarding software platforms that can integrate our suite of products and services. This, along with their due diligence questionnaire and analytics, helps to assess and classify the risk found in supplier relationships, and can be aligned with the organizational risk appetite. Organizations choose our unified technology and information solution to help streamline their third party compliance processes and workflow, and to form a proactive, connected governance, risk and compliance strategy.
